

***Aaton-Transvideo exhibits booth #400 at the BSC Expo - 2-3 February 2018
Battersea Evolution Battersea Park, London UK***

Aaton-Digital presents its latest development on the Cantar family, location audio mixer-recorder.

The new Cantaress, advanced mixing surface with a super large screen and slim form factor.

The integration of Sennheiser AMBEO™ with A-B conversion and technical listening for the sound mixer.

The new dual battery charger with interface to the CantarX3 and the Cantaress.

The Cantar Mini shoulder support system, allowing up to 8 RF receivers and their batteries.

Transvideo shows the latest development for professional monitoring.

The Steadicam™ ultimate monitoring solution for most demanding professional operators, CineMonitorHD8 XSBL-Gen2 with 2500 Nits high contrast screen with HDR ability and ultra wide viewing angle .

The new StarliteHD global firmware, including high resolution and low latency display (upgrades available for all previous product)

The StarliteHD-e with intelligent interface for /i-Cooke, Zeiss eXtended lenses and data collection for advanced postproduction.

The StarliteHD-Canon with remote interface for the Canon ME-20 and ME-200.

Demonstration will be done on the booth by Chris Gile and Jacques Delacoux.
